

PRATYUSH HIRAWAT

Aspiring Data Scientist | Machine Learning | Python & AI
Delhi, India • +91 93115 13886 • pratyushhirawat@gmail.com • [GitHub](#) • [LinkedIn](#)

PROFESSIONAL SUMMARY

Results-driven Data Science graduate with hands-on expertise in Python, machine learning, LLMs, and Generative AI. Proficient in building supervised and unsupervised learning models, designing RAG pipelines, and developing Agentic AI workflows powered by LLM APIs. Demonstrated ability to ship production-grade AI-integrated applications across the full development stack. Seeking a Data Scientist, ML Engineer, or GenAI Developer role to build intelligent, data-intensive products at scale.

TECHNICAL SKILLS

- **Languages:** Python (Advanced), Java
- **ML / AI / GenAI:** Regression, Classification, LLMs, Generative AI, RAG, Agentic AI, Feature Engineering, NLP, Model Evaluation, PyTorch
- **Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
- **Databases:** SQL (MySQL / PostgreSQL), MongoDB
- **Web & APIs:** React, TypeScript, REST APIs, Google Gemini API, Strapi CMS, LangChain
- **Tools:** Git, GitHub, VS Code, Jupyter Notebook, Google Colab

PROJECTS

SnapClass | [Live Demo](#)

Tech Stack: Python, Streamlit, Flask, Supabase, SQL, Deep Learning, SVC

- Developed an AI-powered smart attendance and classroom management solution with biometric verification, combining Face Recognition and Voice Recognition for secure identity confirmation.
- Implemented secure user authentication and leveraged Supabase as the database backend; executed and managed SQL queries for efficient data operations.
- Applied Deep Learning libraries for Face Recognition and Voice Recognition features, and used a Support Vector Classifier (SVC) for multi-class classification tasks.
- Built the core application using Streamlit and deployed the landing page on Vercel, with both systems fully interconnected for seamless user experience.

AI Gym Coach | [Live Demo](#)

Tech Stack: Python, Streamlit, WebRTC, MediaPipe, OpenCV, SQLite, gTTS, LLM API

- Developed an AI-powered virtual fitness coach capable of real-time exercise monitoring and personalized workout guidance.
- Implemented real-time pose detection using MediaPipe and OpenCV for accurate body movement analysis.
- Built exercise tracking modules for Squats, Push-ups, and Bicep Curls with automated repetition counting.
- Designed intelligent form-correction logic to detect posture mistakes and provide corrective suggestions.
- Integrated LLM-powered coaching intelligence to generate personalized workout feedback based on user performance.
- Added voice-based trainer responses using gTTS to simulate a real gym coach experience.

fitTrack — AI-Powered Fitness Tracker | [Live Demo](#)

Tech Stack: React, TypeScript, Strapi CMS, Google Gemini API, Vercel

- Designed and deployed a full-stack AI fitness application that tracks daily calorie intake and burn, powered by Google Gemini API for personalized recommendations.
- Architected a type-safe React + TypeScript frontend with Strapi as a headless CMS backend, deployed to production on Vercel.

EDUCATION

Bachelor of Computer Applications (BCA) — Specialization in Data Science 2022 – June 2025

Jagannath University, Delhi • Relevant: Machine Learning, Statistics, DBMS, Data Structures, Python, Big Data

CERTIFICATIONS

- Python for Data Science — NPTEL — Sep 2024 – Feb 2025
- Programming in Java — NPTEL — Sep 2024 – Feb 2025
- Tata — GenAI Powered Data Analytics Job Simulation (Forage)
- Deloitte Australia — Data Analytics Job Simulation (Forage)
